Tools » Create Filtered Deck.

1. Recognition:

```
card:"Recognition" is:new tag:"Level1:*Lesson1"
```

(this will show lesson 1, change "Lessonxx" depending on which lesson you want)

Ex. If you only want to study lesson 18 write the following:

```
card:"Recognition" is:new tag:"Level1:*Lesson18"
```

2. Recall Chapter 1 only:

```
card:"recall" is:new tag:"Level1::Chapter1*"
```

(This will show chapter 1, if you want a lesson just write "Lessonxx" instead as written above)

3. Hand Writing:

```
card:"Stroke Order" is:new tag:"Level1:*Lesson1"
```

The syntax for the tags is as follows:

For whole level:

```
"Level1:*" "Level2:*" "Level15:*" etc.
```

For Chapter:

```
"Level1::Chapter1:*" "Level2::Chapter4:*" "Level10::Chapter3:*" etc.
```

For Lessons:

```
"Level1:*Lesson1" "Level4:*Lesson10" "Level20:*Lesson12" etc.
```

4. Review:

```
is:due
```

When all these 4 decks have been created, rename them and add numbers accordingly. Cards will move automatically to the review deck when you have learned them so just make sure you visit that deck sometimes and you don't have to think about reviewing.
